SafeStart is an advanced safety awareness and skills development programme that aims to help people avoid unintentional mistakes that lead to injury. It has helped thousands of companies in over 60 countries move beyond compliance and beyond the workplace to improve employee engagement, culture, family safety and business results. It has been successfully implemented in more than 4,000 companies worldwide, with over 4 million people trained. The programme is available in more than 30 different languages.

Quentic is one of the leading solution providers for Software as a Service in the European EHSQ and ESG market. The company is headquartered in Berlin, Germany, and employs over 250 personnel. Branch offices are located in Germany, Austria, Switzerland, Finland, Sweden, Denmark, Belgium, the Netherlands, France, Spain and Italy. Over 900 customers have already chosen Quentic software solutions to strengthen their EHS and CSR management.

With ten individually combinable modules, the platform excels in managing Health & Safety, Risks & Audits, Incidents & Observations, Hazardous Chemicals, Control of Work, Legal Compliance, Online Instructions, Processes, Environmental Management and Sustainability. Quentic is currently supporting numerous companies in implementing new occupational safety standards to fight the COVID-19 pandemic with ready-to-use instructional content and risk assessments offered within the Health & Safety and Online Instructions modules. The platform is also suited to supporting comprehensive management systems in compliance with ISO 14001, ISO 50001 and ISO 45001.

INTELEX

Intelex Technologies, ULC is a global leader in environmental, health, safety and quality (EHSQ) management software. Since 1992, Intelex employees across the globe have been committed to innovating and enabling organizations to send their employees home safely every day, leaving behind a more sustainable world to the generations that follow, and manage quality so that only the safest and highest quality products make it to market. Intelex's scalable, web-based platform and applications have helped clients across all industries improve business performance, mitigate organization-wide risk, and ensure sustained compliance with internationally accepted standards (e.g. ISO 9001, ISO 14001, ISO 45001, and OSHAS 18001) and regulatory requirements. Almost 1,400 customers in 195 countries trust Intelex to power their EHSQ initiatives. Headquartered in Toronto with regional offices and employees around the world, Intelex became an Industrial Scientific company in 2019. In 2020, Intelex acquired ehsAI, a SaaS-based compliance automation solution that leverages artificial intelligence and machine learning algorithms.

Enhesa is partner to multi-national corporations that want to help build a safer, more sustainable world. Through comprehensive EHS and product compliance intelligence, we empower clients to take care of the environment, health and safety of their collective. Combining our advanced regulatory expertise in 300+ jurisdictions with AI-powered technology, we provide actionable insights in more than 30 languages – covering what compliance means now and how it will change in the future. We help you comply with confidence – today, tomorrow, across the globe.

Krause Bell Group is in the business of preventing workplace injuries and fatalities through leadership and decision making. Leadership and decision making are complementary executive functions that have a critical role in safety culture and serious injury and fatality prevention.

We believe that every effective safety leader needs the 7 Insights in order to achieve safety and organizational improvement.

29th September, 2022

- 08:00 Registration & Networking with Welcome Coffee
- 08:30 Greeting from the Project Lead & GLC Icebreaker Session
- 08:50 Opening Remarks from the Chair

KEYNOTE ARENA

09:00  **SESSION RESERVED FOR**
Institution of Occupational Safety and Health
LOUISE HOSKING
President
IOSH

09:30 **CO-PRESENTATION:**
7 insights into Safety Leadership

The 7 Insights represent new ways for organizations to achieve accelerated safety improvement with direct benefit to organizational functioning in general. We are currently hosting innovation groups in the US and Europe with several partner organizations who share their data, experience, and expertise in order to improve leadership and decision-making in their organizations. Our clients will come out of this project with tools to help senior leaders observe, measure and improve safe decision-making. Through safety innovation efforts like these, we are discovering specific ways cognitive bias causes safe decision-making to break down along with strategies to prevent that from happening. The 7 Insights are:

- Improving safety by engaging workers lifts business performance
- Improving safety starts with preventing serious injuries and fatalities
- Leadership sets safety improvement in motion
- Culture sustains performance, for better or worse
- Leaders need to understand core safety concepts
- Behavior plays a role, but a different one than expected
- Cognitive bias affects safety decisions

Intelex

11:00 **Tea, Coffee, Networking & Exhibits**

TRACK A

11:30 **Leadership: Organisational versus individual resilience**

Resilience can be categorised as the ability to manage and endure challenges, and it is a desirable attribute in organisations, however, typically this is expressed at an individual level. In this presentation, Dee will discuss:

- what resilience should actually mean in the workplace, both at organisational and individual level
- how high reliability organisations foster resilience culturally

DEE ARP
Chief Operating Officer
NEBOSH

TRACK B

11:30 **How to reach zero accident philosophy**

BART VANMARCKE
Head of Environment, Health & Safety
Pauling

*HSE Governance Manager - Group HSE
Borealis*

11:55 **Target zero: Saipem's Journey to zero fatalities**
Our strategy to face the storm of change

Saipem operates within an industry characterized by constant changes, fluctuations and market evolutions. Yet in this challenging context, Saipem finally achieved its target of zero fatal accidents in 2021. An extraordinary result that did not occur through luck or chance. It happened thanks to a transformation process which started 15 years ago, in the relentless pursuit to building a positive and lasting health and safety culture, by multiplying effective safety leadership. The foundation of this process is the Leadership in Health and Safety programme, which has equipped leaders with the moral compass and a positive mindset to become mature safety leaders, capable of managing the waves of change, influencing behaviours and, above all, constantly maintaining a strong safety focus.
