

## VIRTUAL ACADEMY PROGRAMME

Keep your Safety efforts up and running  
anytime, anywhere.

“

A great solution for organisations  
where some employees are too far  
away to reach but cannot be left  
behind when it comes to safety.

”

We all know that it takes a lot of time and effort to create a sustainable safety culture. And we also know that a successful safety programme trains employees to look out for their own safety and the safety of others. So, what happens when lone workers don't have colleagues beside them to rely on for safety support? Or what happens when you have part of your workforce working remotely?

SafeStart has an advanced remote worker delivery model that can be used to effectively train your team wherever they are at any point in time. Using a combination of live video training workshops, web-meetings, coach-by-phone and self-learning, we can help organisations to keep on track and keep their employees safe irrespective of distance, disruption to travel or group meeting restrictions.

**Don't let your Safety improvement efforts and programmes be derailed by distance or isolation. Contact us to find out more and keep your people safer 24/7, no matter where they are!**

### Key benefits of SafeStart's Virtual Academy:

- **Consistent message**  
Same content, same knowledge, same quality... employees in the workplace or away from the workplace being trained at the same pace.
- **Continuation of training**  
No unnecessary gaps between training sessions, no matter what.
- **Cost-effective**  
Train more people at the same time with reduced travel expenses.
- **Efficiency**  
Ready to go programmes that work 24/7.
- **And more!**

**Working remotely is no longer a barrier to effective safety training!**
