TAKE PART IN OUR
HALF-DAY SAFESTART DISCOVERY WORKSHOP
AND FIND OUT FOR YOURSELF **WHY SAFESTART IS THE MOST
SUCCESSFUL SAFETY TRAINING PROCESS IN THE WORLD.***

Over 3,000 companies in over 60 countries have leveraged SafeStart to develop the personal, 24/7 safety skills of more than 3,000,000 people—resulting in average injury reductions of 50%. **SafeStart doesn't replace anything you're currently doing—it complements your existing programmes to help you reach your corporate safety goals.** It does this by addressing unintentional human error and critical decisions compromised or negatively influenced by rushing, frustration, fatigue and complacency.

These workshops **also demonstrate the other company-wide benefits SafeStart brings**, including financial savings and improvements in morale, productivity, quality and team communication. The concepts and techniques are so effective and universally-applicable, that we're now expanding the programme into schools and high performance sport to reduce injuries for those who need it most - our future generations

WHY YOU SHOULD ATTEND?

1.

To understand how SafeStart delivers rapid performance improvements whatever industry you're in.

2.

To learn how your company can move beyond compliance and beyond the workplace to improve employee engagement, culture, 24/7 safety and business results.

**FREE OF
CHARGE**

HALF-DAY SAFESTART DISCOVERY WORKSHOP

 May 14th, 2019  The Queens Hotel

Every workplace has at least one chronic safety pain—some recurring issue that leaves the safety manager frustrated and employees in harm's way. **Almost 95% of workplaces experience at least one of the following six common pain points:**

- recurring injuries (e.g., sprains and strains, slips/trips and back injuries)
- lack of employee engagement
- stalled injury reductions
- lacklustre safety culture
- employees taking shortcuts and ignoring rules
- perceived conflict between productivity and safety

This half-day discovery workshop will connect the dots between what's causing your safety pain and the practical steps you can take to minimise or even eliminate these safety issues.

DAVID HUGHES is the Development Director for SafeStart in the UK, Ireland and Nordic countries as well as managing some of SafeStart largest global projects. A highly experienced member of the SafeStart team, David has designed, delivered and managed sustainability-based consulting, Behavioural Safety, culture change and learning and development projects with SafeStart since 2007. David works across a variety of industries, such as Oil and Gas, Pharma, Chemical, Manufacturing, Transport and Logistics and Food to name but a few.

NEIL SHEEHAN is a highly qualified and experienced senior safety professional who has progressed from safety advisor to boardroom level. With 40 years hands on leadership experience, including 27 years in the armed forces to senior management in multi-million-pound organisations, Neil is committed to putting the positivity into safety and to inspire the present and future leaders by providing pragmatic, realistic safety consultancy and leadership training. During his military career, he served 5 years at the Royal Military Academy Sandhurst teaching leadership skills to the future officers of the armed services. Neil has presented at many safety and leadership conferences across Europe.
